

Valency Networks

Valency Networks is a firm specializing in the field of IT infrastructure design, deployment, and process management. It also offers highly technical solutions in the area of IT/Cyber Security too. Our mission is to be a technology and business solution provider, in the niche areas of IT infrastructure services, by leveraging years of global technical experience we possess. Our mission is to provide offerings which results into a high performing, scalable, reliable and redundant IT infrastructure for our customers to help improve their ROI.

Our Philosophies

Security is never 100%, but in fact it is an ongoing process, which demands for continuous improvement

Security is not just about the products but about the customized solutions

Security is a two way process which involves us as well as the technology management on client's side

Cyber Security Services

With the ever changing IT industry scenario in the country, need for strengthening information security is increasing too. Many firms do possess a verity of powerful IT infrastructure components and services but lack IT security, exposing themselves to various vulnerabilities, hacking attacks, viruses, spywares etc. While there are multiple vendors with various product and offerings in the market, we at Valency Networks saw a need to address the requirements in an agile way and hence aligned our offering security services in that fashion
